

TAG delivers supply chain and financial process optimization to healthcare providers through deep analytics, expert insight, and operational & organizational transformation.

You've identified inefficiencies across verticals varying from systems to people, but you're faced with the uncertainty of knowing where to begin. As a strategic partner, TAG identifies the full scope of your challenges, including those that may not be so obvious.

\$1.0M
Avg. Recovery per Audit

1 GETTING STARTED

TAG advisors review expenses to expose cash flow opportunities in an effort to help your immediate bottom line. We then go beyond audit recovery by identifying gaps in your current systems and procedures for a more in-depth analysis.

2 YOUR IMPROVEMENT

TAG's team of experts uncover and link factors that contribute to inefficiency. We then craft best-practice procedures and recommendations that allow your facility, verticals, and teams to run in an optimized state.

TAG guides you through this transformational process

3 PARTNERING TO GO BEYOND

TAG guides clients through the transformation phase to ensure leaders, teams, processes, and systems are working in synchrony. This empowers your facility to grow autonomously and confidently knowing former gaps have been fully addressed. Additionally, we stay on top of the latest technology and industry knowledge within the ever-evolving financial and health sectors in order to capitalize on new efficiency opportunities.

Going Beyond Recovery™

TAG's transformational process turns audit analysis into a vehicle that fuels long-term growth.

The TAG Difference!

How We Make a Difference

We deliver permanent transformational opportunities through our process of understanding your cash flow, simplifying your procedures, discovering compliance opportunities, and coaching your teams and leadership.

"I've used other auditing companies in the past, but TAG engaged us on our terms which developed into a long-term partnership. TAG not only recovered our expenses, but they also helped discover gaps in our processes and implemented custom solutions to fix them. We now have sustainable processes in place to ensure we can focus our efforts on other areas."
